

## Different Gateron KS-33 Low Profile 2.0 Switches Features

	Type	Operating force	Pre-travel	Travel distance	Sound level	Suitable for
 Red Switch	Linear	50 ±15 gf	1.7 ±0.4 mm	3.0 +0.2 mm	Low	Gaming/office
 Brown Switch	Tactile	55 ±15 gf	1.7 ±0.4 mm	3.0 +0.2 mm	Medium	Midway gaming/office
 Blue Switch	Clicky	65 ±15 gf	1.7 ±0.4 /-0.3 mm	3.0 +0.2 mm	Loud	Typist

### New Breakthrough And Upgrade Typing Feel

The Gateron KS-33 Low Profile 2.0 Switch is upgraded from the original KS-27 Low Profile Switch. It is one of the best ultra-slim mechanical keyboard switches that feature longer pre-travel and travel distances than the previous KS-27, but still actuates quicker than the normal profile switch. It not only ensures a fast, comfortable, and smooth fingertip feel but also reduces accidental keystrokes. If you enjoy lightning-speed typing or fast-paced gaming, this is your ideal match.

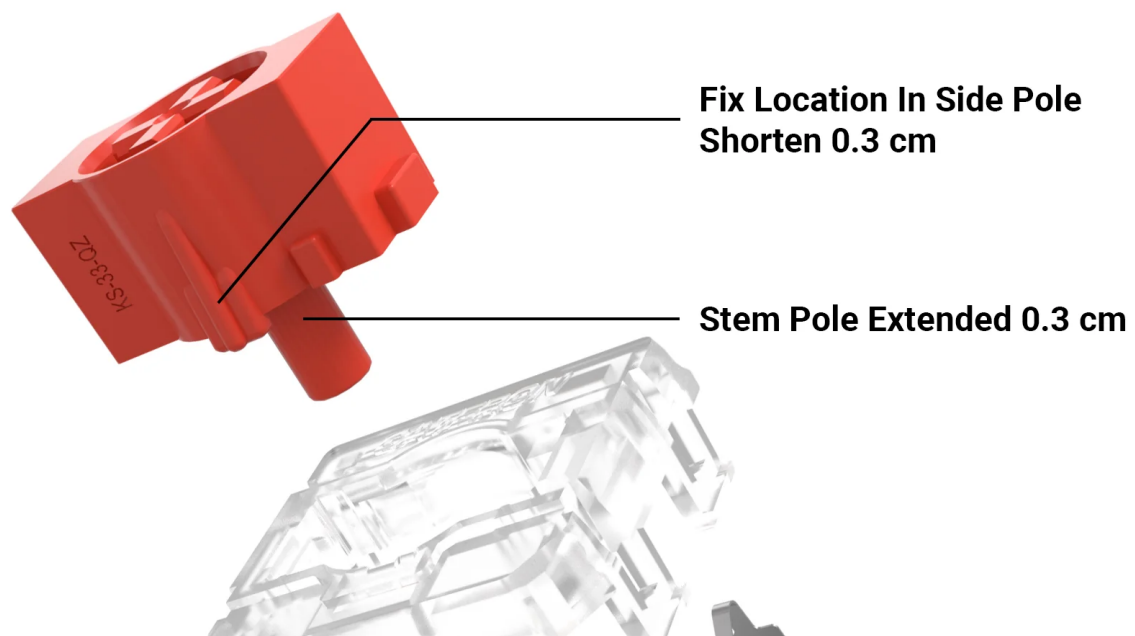

### Waterproof And Dustproof

The MX-styled stem is designed with a circular dust wall structure to resist the intrusion of water and dust.

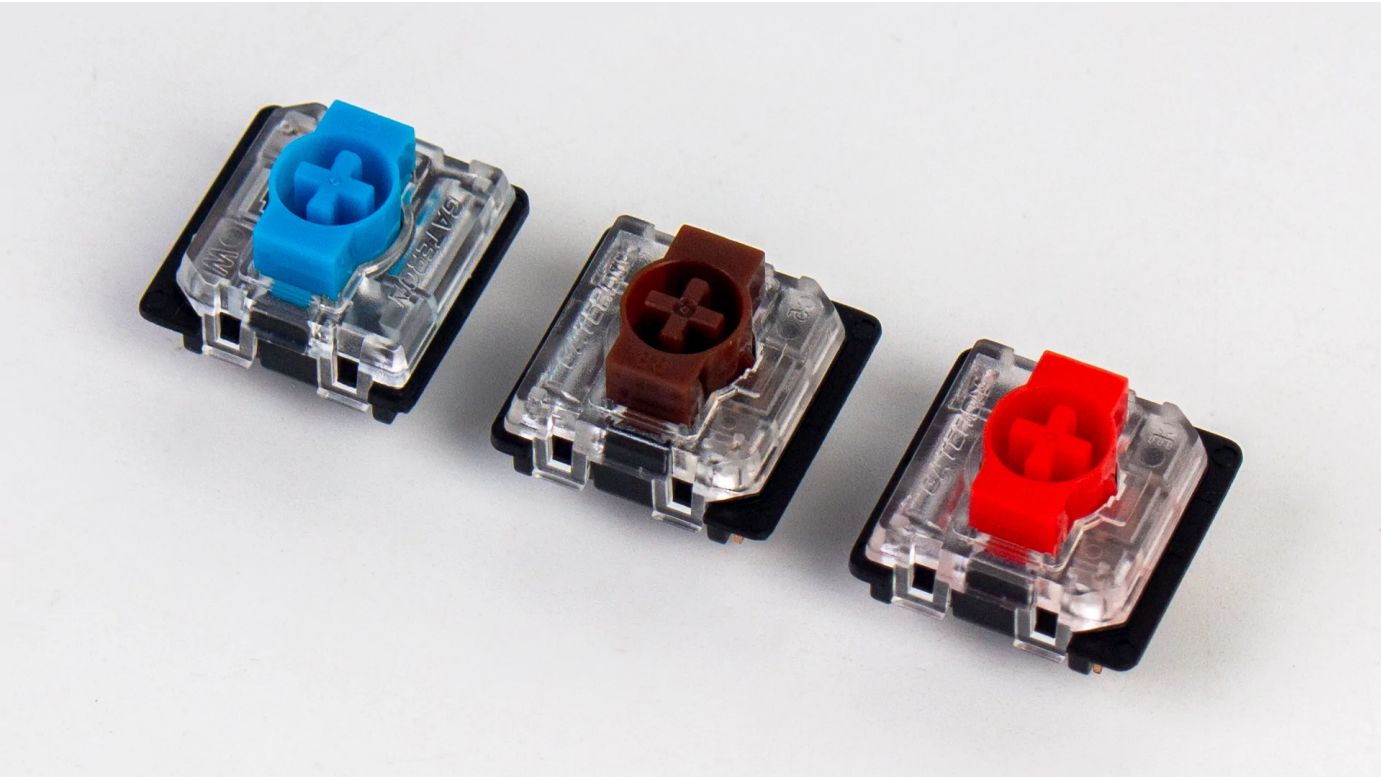

## Improve Bottoming-out Feel

This brand new low profile switch is built with an extended 0.3 cm in the Positioning column inner stem pole and a shortened Fix location in the side pole of 0.3 cm. It resolves the original issue of bottoming out early.

## Linear, Tactile, And Clicky

Available in your choice of tactile, linear, or clicky switches. It also comes in brown, red, and blue colors.

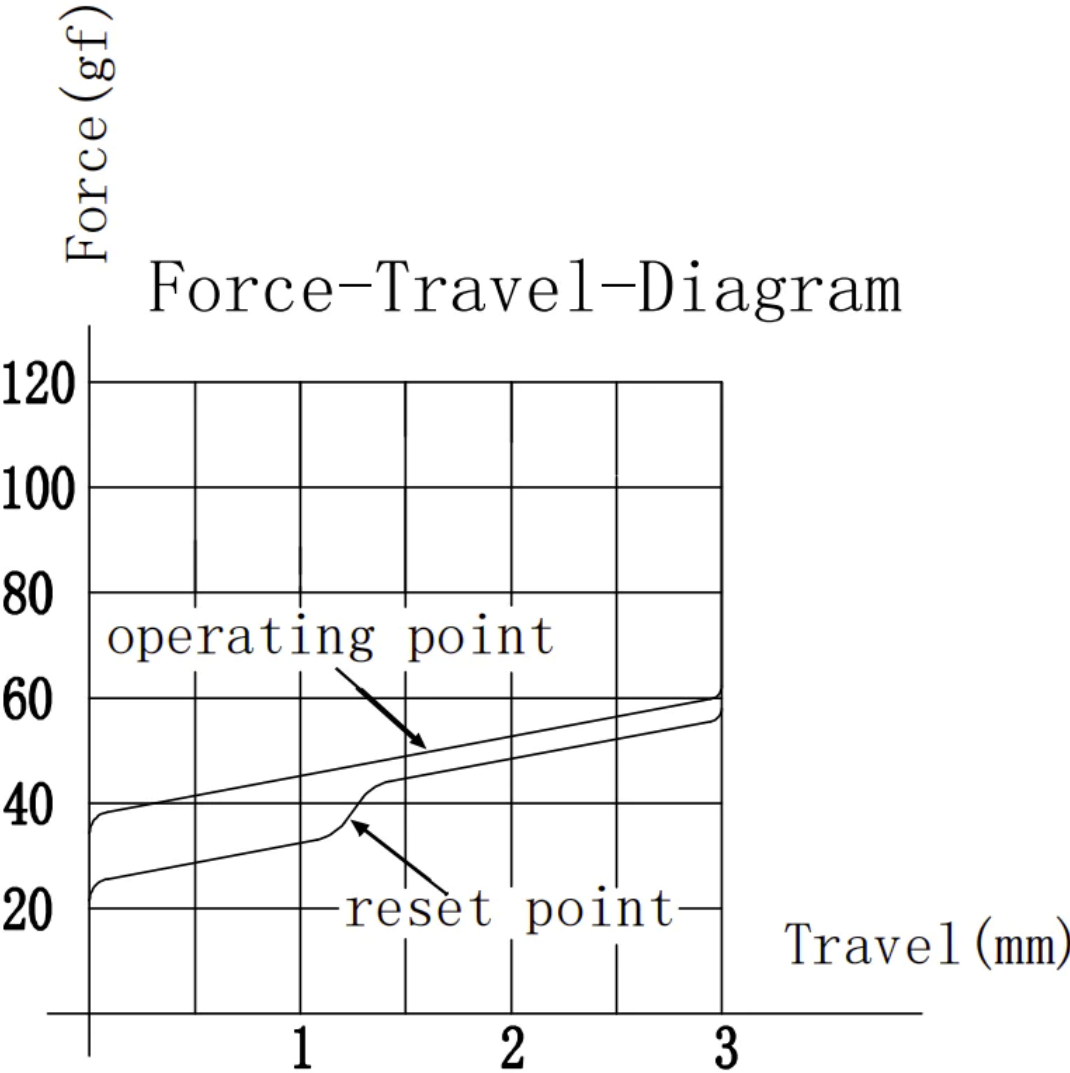

## Product Information

### Low-Profile 2.0 Red

Type	Linear
Operation Force	50±15 gf
Pre-Travel	1.7±0.4 mm
Total Travel	3.0±0.2 mm
Operation Life	Up to 60M cycles

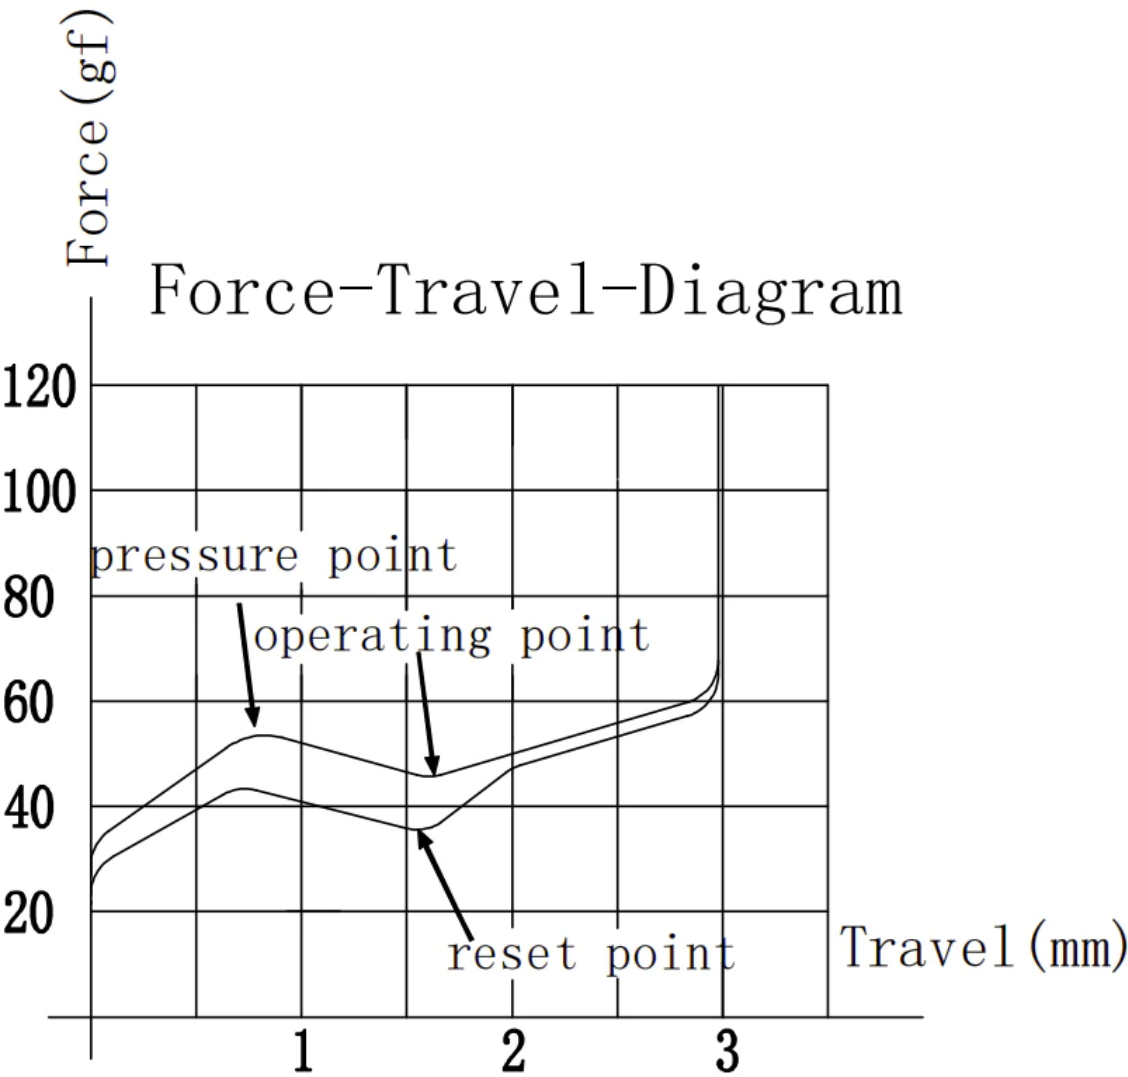

Finger Strike Feeling	Vertical, fast and responsive, light pressing force, soft rebound
--------------------------	---

Low-Profile 2.0 Brown

Type	Tactile
Operation Force	55±15 gf
Pre-Travel	1.7±0.4 mm
Total Travel	3.0±0.2 mm
Operation Life	Up to 60M cycles

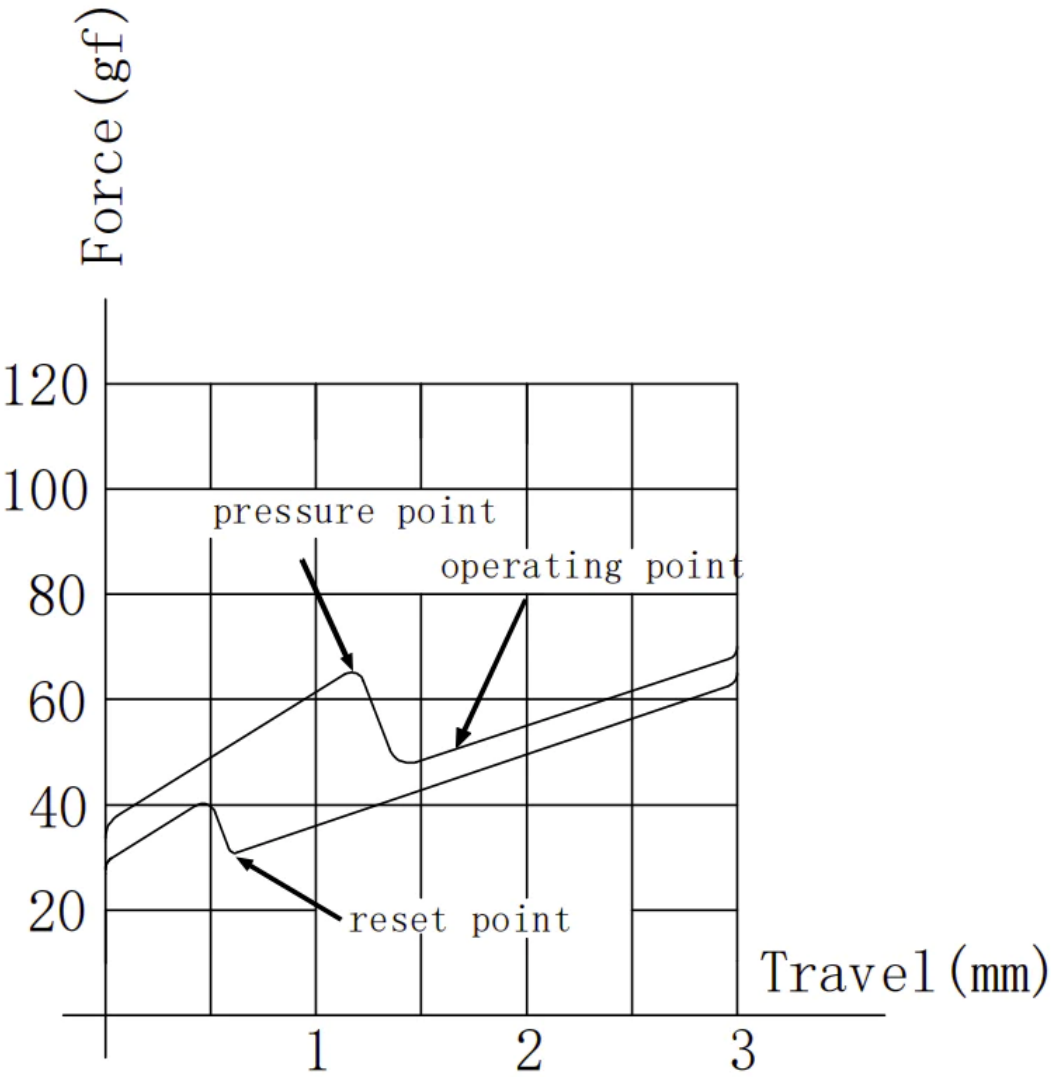

Finger Strike Feeling	Bump, tactile responsive, moderate pressing force, clear rebound
--------------------------	--

Low-Profile 2.0 Blue

Type	Clicky
Operation Force	65±15 gf
Pre-Travel	1.7+0.4/-0.3 mm
Total Travel	3.0±0.2 mm
Operation Life	Up to 60M cycles

Finger Strike Feeling	Fast tactile typing, moderate pressing force, clear rebound
-----------------------	---

Specs

Product Name	Gateron KS-33 Low Profile 2.0 Switch
Stem	POM, MX stem
Upper Housing	PC, transparent housing
Housing Base	Nylon PA66, black base
Spring	Spring steel

Pins	3-Pin switch (No standard)
Lubrication	Lubed version
SMD LED Support	Yes

PS: SMD is an acronym for Surface Mounted Device. Their LEDs are attached to a rectangular printed circuit board (PCB). These LED chips can come in a variety of shapes and sizes that can produce different light intensities and colors.

### Compatible Keyboards

Compatible with hot-swap low-profile MX mechanical gaming keyboards/low-profile DIY custom keyboards with SMD-LED or RGB-LED light.
